Dr. Chamberlin spoke of the "high po-tency of the mechanism" of the heavenly machine; he spoke of the discoid form of our planetary system, and many other in-teresting methods of expressing what poets call "the music of the spheres," and he gave to the audience the impression of a man who understands the harmony of the universe as well as the human mind

Records of Earth's Origin.

In introducing his lecture, Dr. Chamber, called attention to the fact that there are dynamic vestiges of the earth's birth and the same sort of records for the birth of other worlds and whole systems of worlds, just as there are geologic traces of the earth's early hours. "If a solar system had ever been within a billion miles of a body the size of our sun there would remain dynamic vestiges on our system," he said.

Dr. Chamberlin said that one could read

Discusses "Disbursive Influence."

Discusses "Disbursive Influence." In speaking of his new theory that 'disbursive influence" which scat tered the systems through the heavens is responsible for this particular sysis responsible for this particular system, he referred to "dynamic collisions," which would have ten million times more energy than actual collisions of heavenly bodies. A "dynamic collision" would be the contact between two areas of influence; a sun's billions of miles of space passing within 1 billion or two miles of another sun, for instance, and dragging away with it a portion of its gaseous fire. He also said this sort of a contact has ten million more chances to happen than an actual collision.

Toward the end of the lecture Dr. Chamberlin impressed on his audience that he was not speaking of the origin of the great bodies of stars and suns in all the universe, but merely of this system of planets around the sunsome celestial thief, passing too close to the sun, pulled out a large clot from the sun's disc and turned it into our little planet family.

Frank E. Morton to Speak.

ADDRESSES AND MUSIC

Whitewash is a poplar spray

### Th' victory at Przemysl may have been pronounced, but not th' FACTS FOR THE INQUIRY

Made to Citizens' Executive Committee.

fer family trees.

Abe Martin Says:

At a meeting of the executive committee of the joint citizens' committee on the fiscal relations between the District of Columbia and the federal government tonight in the offices of Henry B. F. Macfarland, chairman, in the Evans building, reports from the various subcommittees appointed to gather facts will be received. Discussing proposals which have been

made by some members of Congress to the half-and-half plan of appropriating for the District, Mr. Macfarland said last night: "One of Aesop's fables tells of a dog with a piece of meat in his mouth crossing a stream on a bridge, that, seeing the shadow of the meat in the water much larger than the meat it-

### self, opens his jaws to get the shadow and loses the meat.

Pictures District Conditions. "This pictures exactly what would happen if the District of Columbia grasp the 'shadow in the water' of the scheme to have the District taxpayers pay whatever Congress exacts toward the District expenses and let the United

States pay the rest. states pay the rest.

"In its practical results this is the scheme of the Johnson rider, the Johnson-Prouty amendment and all the other legislation avowedly intended to put the whole burden of the maintenance of the National Capital on the District taxpayers, increasing their taxes accordingly.

put the whole burden of the maintenance of the National Capital on the District taxpayers, increasing their taxes accordingly.

"No one having practical experience with appropriation committees, the traditional watch dogs of the Treasury, always reducing estimates, if possible, can imagine if there was no fixed proportion of contribution to the expenses of the National Capital that the appropriate as much as one-half from the United States Treasury. But, on the contrary, the contribution would vary from less than one-half toy nothing at all.

"M. Blackburn gave the reason why a definite proportion was adopted in 1878 as against the illusory proposition for no definite contribution from the United States when he said that the latter, if adopted, would leave the National Capital to the 'whim' and 'caprice' of each recurring session of Congress.

### Places Primary Responsibility.

tween Washington, a unique national capital, which is nothing else, and for-eign capitals, which are all industrial and commercial cities."

"It is impossible to get education on the storage battery process. You can put a certain amount of current into a storage battery and you will get a cer-tain amount out of it. But you cannot do this with the human machine. The student must get his own experiences for himself-not second-hand. If the

While courage will always be a prime the man of knowledge who takes the by Stem," he said.

Dr. Chamberlin said that one could read the symmetries and harmonies of the heavenly bodies to find these "dynamic vestiges." He spoke of the manner in which the millions of worlds, the stupendies sparsely in space as "the deployment of the solar systems," and declared that their scattering so sparsely in space was evidence to those who can read the dynamics of the universe that their deployment is the result of a prodigious energy.

Dr. Chamberlin presented some refutations of other hypotheses concerning the origin of the solar system. Regarding the theory that our earth and accompanying planets were whirled off the sun, boiled down, Dr. Chamberlin's refutation was that the sun's equator and its velocity shows no "dynamic vestiges" of any such occurrence.

Notes Great Rate of Speed.

"We shall, of course, insist that the primary responsibility for maintaining the maintaining the National Capital is on the government which created it for its own purposes and exclusively controls it, but we know practically that unless we can went which created it for its own purposes and exclusively controls it, but we know practically that unless we can we have counted," said the Secretary. Now it is the man with mathematical the half-and-half plan Congress, will appropriate, first, the amount of the District revenues, and then add uncertain amount, varying with each session of Congress, with the condition of the national Treasury and with the political weather.

"Every citizen, therefore, should support the joint citizens' committee in obtaining the utmost that is possible in practical certainty as against a 'shadow in the water.'

"Analogies with other cities, always unsatisfactory because of the difference in local conditions, are impossible between Washington, a unique national termination."

"Analogies with other cities, always unsatisfactory because of the difference in local conditions, a unique national termination."

inasmuch as the American people had seen fit to elect a teacher as their President I thought it was a great privilege for any one to be a teacher. He thought at first, he said, that the idea of schools on the ships was a new one, but later had found that John Paul Jones and many other famous sea commanders had advocated such schools.

Secretary Daniels complimented such schools.

Secretary Daniels complimented President Stockton on his work, and in conclusion extended greetings from "the university affoat to the university safely anchored here in the capital of the section."

### Need of Breadth and Liberality.

President Stockton in his address de-

clared that the objects of a university such as George Washington and others

of his time had in mind "cannot be at-FEATURES OF PROGRAM

Commissioner Claxton, Former Ambassador Hill and Secretary Daniels Among the Speakers.

Fraise for George Washington University as a leader in educational to the fact that the university has encolled now, in round numbers, 1,800 students in all departments alone we have more than \$5.0 men," he said, "making our university his great undergraduate departments alone we have more than \$5.0 men," he said, "making our university his great undergraduate departments alone, as well as in its professional departments, the largest institution of its kind from Philadelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelphia, in the north, along the seaboard of the Atlantic to New Orphiladelp tained by a post-graduate university levoted to individual and narrow but

Referring to the fact that George of George Washington University will Washington University has no great be more and more widely adopted edifices like some of the higher instituthroughout the country as time goes tions of learning, David Jayne Hill,

be more and more widely adopted throughout the country as time goes on not only in colleges and university on not only in colleges and universities but also in high schools and, in many cases, primary schools, was prophesied by Dr. Philander P. Claxton, United States commissioner of education. The feature to which referred was that a large percentage of the students devote part of their time to work and the remainder to study. In this manner, declared Dr. Claxton, they feel the need of that which they are learning and also have opportunity to apply it.

Dr. Claxton spoke of the methods used at the University of Cincinnatic and other institutions of learning, David Jayne Hill, former ambassador to Germany, and at one time an instructor at the university, declared that "deducation is not obed in purple and fine linen." He dold of a Rhodes scholar who said he thought the spirity which predominated those students with whom he came in contact, was "a proud sense of unapproachable superiority." "No, no," said Mr. Hill, "there is too much of that in the world. I am glad to say none of it is to be found at George Washington." He paid a brief tribute to the late Justice Harlan. In the reconstruction of Belgium many of the institutions of the United States will be copied, in the opinion of Dr. George Sarton of the United States will be copied, in the opinion of Dr. George Sarton of the United States will be copied, in the opinion of Dr. George Sarton of the University of Ghent, who spoke briefly. He declared that since coming to America a few months ago he had been "living in the twentieth century." Few people abroad really know your country." he said.

Given General Approval.

"In one city where this was being tried I made inquiries about it," he explained. "The mill owners liked it because the children devoted more attention to their studies when in school, and the system, because, they said, the children devoted more attention to their studies when in school, and the children liked it because they did not tree so easi

LIFE'S ENTERPRISES: "No Great Deed Is Done by Falterers Who Ask for Certainty"

Such are the words of one who was wise in the ways of the world and in human nature as well. IT IS A GREAT DEED for parents to establish a permanent home. The foundation of the republic is the

The wealth of a nation lies entirely in its people. There is more money in the scientific breeding of human creatures than in bovine and more money in the proper equipment and care of the young than of railways.

The welfare of yourself and family can best be served in all times by owning
